

SOLAR
COMPATIBLE

WG205

for swing gates

Automation kit for double swing gates
up to 4.5m wide and up to 450kg

Reliable and quiet: die-cast powder-coated aluminium body, gear motor mounted on bearings

Extra safe: low voltage connections (24V), automatic obstacle detection feature

Auto-programming and diagnostic system: automatically calculates the most suitable operating parameters for each gate. Identifies and immediately signals any connection errors or malfunction

“Plug ‘n Play” connections: very simple and quick, with easy identification of wires and terminals. ECSBus system for connection of up to seven pairs of photocells using only two wires

Quick motor release: for manual gate operation

Control unit with integrated receiver featuring:

- 2 variable speeds for smooth operation
- timed and adjustable automatic closing function
- easy programming of additional remote controls (up to 150)
- obstacle sensitivity and partial opening adjustments

mhouse

Downee

2 WG20 Electromechanical gear motor with integrated control unit and 433.92 MHz variable code receiver. 3 house release keys and mounting brackets included.

GTX4 433.92 MHz, 4 button variable code transmitters. Practical wall rest included in the package.

PH100 Pair of wall-mounted autosynchronized photocells.

FL100 Adjustable flashing light, with built-in aerial.

External Transformer supplied with all External Transformer kits.

Optional accessories

PF Solar power kit.

PBC Battery charger power supply unit, for PF.

DS1 13-key digital switch with programmable code, via radio.

R2 Operate your gate and garage door on the one remote.

PT50 Two 485 mm high posts including one pair of photocells.

PT100 Two 945 mm high posts including two pairs of photocells.

EL1 112 V electric lock interface.

PR1 Buffer battery for emergency power supply.
